

INDEX TO VOLUME XIX

	Page
Action of	
An oxidizing agent in bread dough made from patent flours. Baker, Parker, and Mize.....	334
Hydrogen peroxide on wheat flour when used in combination with reducing agents. Elion.....	594
"Alkali number" of starch as criterion of degree of cooking. Benham...	597, 599
"Alkali numbers" of various cereal products. Benham.....	600
Alpha-amylase in malt evaluation. Kneen and Sandstedt.....	190
Alsberg, Carl Lucas, memorial to. M. K. Bennett.....	721
Amylase	
And protease systems of malted wheat flour. Hildebrand and Burkert....	27
In germinating wheat, influence of temperature on. Kneen, Miller, and Sandstedt.....	11
Amylopectin in starch. Kerr, Trubell, and Severson.....	66
Amylose in starch. Kerr, Trubell, and Severson.....	70
Andrews, A. C. (See C. O. Swanson).....	102
Andrews, John S., Harold M. Boyd, and David E. Terry. Riboflavin content of cereal grains and bread and its distribution in products of wheat milling...	55
Anker, C. A., and W. F. Geddes, with C. H. Bailey. Study of the net weight changes and moisture content of wheat flour at various relative humidities..	128
Anker, C. A.	
(See W. F. Geddes).....	605
(See F. C. Hildebrand).....	805
Apparatus	
Fermentometer for gas production. Glabe.....	230
Flour particle size measurement. Hildebrand, Ferrari, Borchardt, and Anker.....	811, 812
Gluten testing device. Baker, Parker, and Mize.....	338
Application of various baking test methods to the evaluation of soft wheat. Shellenberger, Hodler, and Nelson.....	367
Ash in shorts as correlated with crude fiber. Schlesinger.....	838
Ashworth, U. S., N. S. Golding, G. H. Farrah, and D. D. Miller. Chemical factors affecting the baking quality of dry milk solids. I. Correlation of pH and baking score.....	94
Ashworth, U. S., and Herbert A. Harland. Chemical factors affecting the baking quality of dry milk solids. II. Effect of milk on gluten fractionation.	830
Atkin, Lawrence. (See Alfred S. Schultz).....	529, 532
Axelrod, B. (See E. J. Coulson).....	301
Ayre and Anderson proteolytic activity method, study of. Hildebrand.....	263
Bactericidal and fungicidal properties of a crystalline protein isolated from unbleached wheat flour. Stuart and Harris.....	288
Bailey, C. H.	
(See C. A. Anker).....	128
(See Olof E. Stamberg).....	507
Baker, H. W., and N. L. Gregory. Some preliminary studies pertaining to the operation and use of the Buhler mill.....	267
Baker, J. C., and M. D. Mize. Relation of fats to texture, crumb and volume of bread.....	84
Baker, J. C., H. K. Parker, and M. D. Mize. Action of an oxidizing agent in bread dough made from patent flours.....	334
Baking	
Effect of, on thiamin. Schultz, Atkin, and Frey.....	534-537
Ingredients and manipulations, effects of, on Farinograph curves. Moore and Herman.....	568
Quality, effect of heat treatment of milk on. Stamberg and Bailey.....	507
Quality of milk solids. Ashworth, Golding, Farrah, and Miller.....	94
Qualities of spring wheats, as determined by the gluten-starch blend baking methods. Harris and Sibbitt.....	763
Test for soft wheat. Shellenberger, Hodler, and Nelson.....	367
Tests and the evaluation of new wheats. Bayfield and West.....	493

Pigment, estimation of, in flour extracts. Binnington	169
Polarograph studies of heat treatment of milk in relation to baking quality.	
Stamberg and Bailey	507
Precision of flour moisture results between and within laboratories. Geddes and Anker	605
Prescott, R. T. Book review. Chemical formulary, Vol. V, by Bennett	314
Protease	
Activity and reducing matter content of wheat flour doughs in relation to baking behavior. Shen and Geddes	609
In malted wheat flour. Hildebrand and Burkert	27
Protein	
Crystalline, from wheat flour. Balls, Hale, and Harris	840
Crystalline, from wheat flour lipoprotein. Balls, Hale, and Harris	279
Soluble, washed from gluten. Baker, Parker, and Mize	341, 342
Proteins, corn, as affected by storage. Jones, Divine, and Gersdorff	822-824
Proteolytic activity	
Method, collaborative study of. Hildebrand	263
Of malt, viscometric determination of. Koch and Laurretta	315
Simple method for. Landis	419
"Purothionin," a crystalline protein from flour. Balls, Hale, and Harris	840
Quality of North Dakota durum wheat as affected by blight and other forms of damage in 1940. Harris and Sibbitt	403
Quantitative control test for iron added to flour. Flohil and Brown	81
Reducing matter in flour doughs. Shen and Geddes	609
Reitz, Henry C., Ross Aiken Gortner, and Raymond E. Carlson. Hysteresis of air dry wheat starch	423
Relation between the vitamin-A-active carotenoids in corn and the number of genes for yellow color. Kemmerer, Fraps, and Mangelsdorf	525
Relation of fats to texture, crumb, and volume of bread. Baker and Mize	84
Report of	
Malt analysis standardization committee. Dickson	249
1940-41 committee on testing biscuit and cracker flours. Loving	358
1940-41 committee on methods of testing cake flour. Montzheimer	351
1940-41 committee on testing of self-rising and phosphated flours. Modeer	364
Reworking of fermenting doughs. Frank	379
Riboflavin	
Content of cereal grains, mill products and bread. Andrews, Boyd, and Terry	55

	Page
Content of cereal grains and bread and its distribution in products of wheat milling. Andrews, Boyd, and Terry	55
Microbiological method for. Andrews, Boyd, and Terry	56
Rice	
Composition of. Sreenivasan	37, 49
Nutritive value of dry and wet cultivated. Sreenivasan and Sadasivan	47
Varieties, nutritive value of, protein and mineral constituents of. Sreenivasan	36
Rich, C. E. (See H. Johannson)	308
Roehm, L. S., S. A. Shrader, and V. A. Stenger. Bromide residues in cereals fumigated with methyl bromide	235
Rumold, Perie. Interpreting experimental milling from a commercial aspect	384
Sadasivan, V. (See A. Sreenivasan)	47
Sair, L., and W. R. Fetzer. Determination of moisture in the wet milling industry	633-720
"Salt-rising" doughs	
Biochemical properties of. Milner and Geddes	723
Gas production in. Milner and Geddes	734-738
Physical properties of. Milner and Geddes	741-744
Sandstedt, R. M. (See Eric Kneen)	11, 181
Schlesinger, J. S. Correlations between crude fiber and ash of wheat shorts	838
Schultz, Alfred S., Lawrence Atkin, and Charles N. Frey.	
Stability of vitamin B ₁ in the manufacture of bread	532
Thiamin content of wheat flour milled by the stone milling process	529
Self-rising and phosphated flours, committee report on. Modeer	364
Severson, G. M. (See Ralph W. Kerr)	64
Shands, H. L., Allan D. Dickson, and James G. Dickson. Effect of temperature change during malting on four barley varieties	471
Shands, H. L. (See Allan D. Dickson)	411
Shen, Ting, and W. F. Geddes. Protease activity and reducing matter content of wheat flour doughs in relation to baking behavior	609
Shellenberger, J. A., Paul W. Hodler, and C. A. Nelson. Application of various baking test methods to the evaluation of soft wheat	367
Shorts, correlation between crude fiber and ash in. Schlesinger	838
Shrader, S. A. (See L. S. Roehm)	235
Sibbitt, L. D. (See R. H. Harris)	388, 403, 458, 763
Simple method for the approximate estimation of proteolytic activity. Landis	419
Sister Mary Lauretta, S.S.N.D. (See John R. Koch)	315
Smith, Donald E., and W. F. Geddes. Yeast fermentation and potassium bromate as factors influencing the harmful effects of wheat germ on baking quality	785
Sodium chloride in bread. Irvin	346
Sodium salicylate dispersion	
Of spring wheat gluten in relation to variety and environment. Harris, Olson, and Johnson	748
Rates for some spring wheat glutes. Harris, Olson, and Johnson	751-759
Soft wheat, evaluation of, by baking tests. Shellenberger, Hodler, and Nelson	367
Some effects of reworking fermenting doughs. Frank	379
Some preliminary studies pertaining to the operation and use of the Buhler mill. Baker and Gregory	267
Sreenivasan, A., and V. Sadasivan. Nutritive value of the protein and mineral constituents of dry and wet cultivated rices	47
Sreenivasan, A. Nutritive value of the protein and mineral constituents of rice varieties	36
Stability of vitamin B ₁ in the manufacture of bread. Schultz, Atkin, and Frey	532
Stamberg, Olof E., and C. H. Bailey. Effect of heat treatment of milk in relation to baking quality as shown by Polarograph and Farinograph studies	507
Starch	
"Alkali number" of. Benham	597-599
Fractions, diastatic analysis of. Kerr, Trubell, and Severson	75
Multiple amylose concept of. Kerr, Trubell, and Severson	64

	Page
Pastes, viscosity measurements on. Brimhall and Hixon	425
Wheat, hysteresis of. Reitz, Gortner, and Carlson	423
Statistical study of the data of subcommittees on testing biscuit and cracker flours. Tarnutzer	518
Stenger, V. A. (See L. S. Roehm)	235
Stone milling process in relation to thiamin in wheat flour. Schultz, Atkin, and Frey	529
Stuart, L. S., and T. H. Harris. Bactericidal and fungicidal properties of a crystalline protein isolated from unbleached wheat flour	288
Study of the net weight changes and moisture content of wheat flour at various relative humidities. Anker, Geddes, and Bailey	128
Sugars in flour, Berliner-Schmidt colorimetric method for. Ziegler	587
Surface active agents, effects of, on dough properties. Swanson and Andrews ..	102
Swanson, C. O., and A. C. Andrews. Factors which influence the physical prop- erties of dough. IV. The effects of surface active agents on the character- istics of the curves made by the recording dough mixer	102
Swanson, C. O. A micro method for determining test weight	468
(See John A. Johnson, Jr.)	216
Tarnutzer, Charles A. Statistical study of the data of subcommittees on testing biscuit and cracker flours	518
Terry, David E. (See John S. Andrews)	55
Test weight determination, micro method for Harris and Sibbitt	458
Swanson	468
Testing of wheat quality by recording dough mixer curves obtained from sifted wheat meals. Johnson and Swanson	216
Tests with the Berliner-Schmidt colorimetric method for the rapid determination of sugars in wheat flour. Ziegler	587
Thiamin By fermentation method, blank for. Laemmle and Barlow	540
Content of wheat flour milled by the stone milling process. Schultz, Atkin, and Frey	529
Distribution in wheat plant. Geddes and Levine	547
In stone-milled flour. Schultz, Atkin, and Frey	529
In wheat plant at successive stages of kernel development. Geddes and Levine	547
Retention in self-rising flour biscuits. Barackman	121
Riboflavin, nicotinic acid, and pantothenic acid contents of wild rice (<i>Zizania</i> <i>aquatica</i>). Nelson and Palmer	539
Stability of in bread production. Schultz, Atkin, and Frey	532
Variability in western Canadian wheat. Johansson and Rich	308
Thiessen, E. F. Effect of temperature upon the viability and baking properties of dry and moist yeast stored for varied periods	773
Thiochrome assay for vitamin B ₁ , fluorophotometers for. Loofbourow and Harris	151
Thomas, James M., Albert F. Bina, and Elmer B. Brown. Nicotinic acid content of cereal products	173
Thomas, James M. (See Elmer B. Brown)	447
Trubell, O. R. (See Ralph W. Kerr)	64
Utility of micro methods of test-weight determination with hard red spring wheat. Harris and Sibbitt	458
Variability in the thiamin content of western Canadian hard red spring wheat of the 1940 crop. Johansson and Rich	308
Viscometric Determination of the optimum pH for the proteolytic activity of malt with gelatin as a substrate. Koch and Laurretta	315
Method for proteolytic activity of malt. Koch and Laurretta	315

	Page
Viscosity	
Changes in sodium salicylate dispersion of hard red spring gluten in relation to variety and environment. Harris, Olson, and Johnson	748
Of starch pastes, measurement of. Brimhall and Hixon	425
Vitamin A carotenoids in corn. Kemmerer, Fraps, and Mangelsdorf	525
Vitamin B components in wild rice. Nelson and Palmer	539
Vitamin B ₁ stability in bread manufacture. Schultz, Atkin, and Frey	532
West, Glenn A., and E. G. Bayfield. Effectiveness of dry milk solids in preventing overbromation of some bleached hard winter wheat flours	481
West, Glenn A. (See E. G. Bayfield)	493
Wheat	
Germ in baking, influence of yeast fermentation and bromate on. Smith and Geddes	785
Meal, quality tests on. Johnson and Swanson	216
Plant, thiamin distribution in. Geddes and Levine	547
Protein, photometric determination of. Zeleny, Neustadt, and Dixon	1
Quality, testing sifted wheat meals for. Johnson and Swanson	216
Wheats, evaluation of, by baking tests. Bayfield and West	493
Wild rice, vitamin B components in. Nelson and Palmer	539
Williams, K. T. Book review. Volumetric analysis, Vol. 1, by Kolthoff and Stenger	845
Yeast, baking properties of, as affected by storage temperature and time. Thiessen	773
Yeast	
Fermentation and potassium bromate as factors influencing the harmful effects of wheat germ on baking quality. Smith and Geddes	785
Viability of, as affected by storage temperature and time. Thiessen	773
Zeleny, Lawrence, M. H. Neustadt, and H. B. Dixon. Further developments in the photometric determination of wheat protein	1
Ziegler, Edwin. Tests with the Berliner-Schmidt colorimetric method for the rapid determination of sugars in wheat flour	587
